

2000

The year is no longer
305,242,199 days but as

290,091,200,500,000,000

oscillations of Cesium

Between 1972 and 2000 a total
of 22 leap seconds was
added

2000 AD

Astronomers estimate that the Sun
has consumed about 35% to 45% of the
original supply of fuel, thus
has enough to last 5 billion
to 8.5 billion more years.
